

BRECKENRIDGE WATER TREATMENT

BRECKENRIDGE, MN

Provided Breckenridge, MN with a new advanced water treatment facility with a capacity of 1,000,000 gallons per day (gpd).

The clear wells located in front of the treatment plant are almost 20 feet deep below ground level.

The superstructure is precast concrete with concrete masonry interior walls. The second floor houses high service pumps with motors and long shafts. The submersible pumps hang 20' down and are supported by the structure. Concrete floors were designed to provide high load capacity and vibration resistance.

Project Size: 13,000 SF Treatment Space
1,000,000 Gallon Clearwell

Completion Date: 2018

Project Cost: \$9 Million
